Python | C++ | C | SQL | React | Node.js | HTML | OpenAI GPT-4 | Claude API | Git | Javascript

EDUCATION

University of Illinois Chicago, College of Engineering

Expected May 2028

B.S. Computer Science - Software Engineering, **3.54**

Activities: Women in Computer Science, Association for Computing Machinery, SparkHacks, Badminton

EXPERIENCE

SWE Intern, Ernst & Young

Hybrid

Generative AI Research & Development Team

June 2025 - August 2025

- Architected 500+ structured datasets and optimized prompts for GenAI automation platform across 15+ client use cases, increasing prompt effectiveness by 35%.
 - Benchmarked LLM outputs (GPT-4, Claude, Llama) and documented 50+ improvements, accelerating team knowledge transfer by 40%.
 - Collaborated with engineers to refine setup, contributing to 20% improvement in AI response quality.
-

PROJECTS

ChiMetrics - Chicago Civic Data Dashboard

(React | Vite | Recharts | Socrata API | Data Visualisation | Javascript)

[live demo](#)

- Built a live civic data dashboard visualizing real-time Chicago public datasets across crime trends, CTA transit ridership, red light/speed camera violations, and 311 service requests.
- Integrated Socrata Open Data API for live data fetching and built interactive charts with Recharts.
- Evolved from an earlier C++ traffic violation analysis tool, rebuilt as a full React application with live API integration.

FaceCart - Skincare Platform

(React | TypeScript | Node.js | Express | OpenAI GPT-4 | Tailwind CSS)

- Collaborated with a team of four at SparkHacks 2026 Hackathon and built a full-stack e-commerce app with AI-driven skincare analysis in 24 hours.
- Engineered conflict detection engine analyzing 40+ products across 200+ ingredient combinations with 0-100 compatibility scoring.
- Integrated GPT-4 for multi-modal analysis, designed end-to-end UX, reducing research time by 80%.

ParallelYou - Multiverse Simulator

(React | Vite | Claude API | Anthropic | Data Visualisation | Vercel)

- Built and deployed a full-stack AI app generating 3 distinct life trajectory timelines based on user background, goals, and risk tolerance using the Claude API.
 - Implemented salary progression charts, side-by-side profile comparisons, PNG export, and dark/light mode shipped to production on Vercel.
-

ACHIEVEMENTS

- Dean's List for Academic Excellence, University of Illinois Chicago, College of Engineering.
